Career Objective

I am a recent Bachelor of Information Technology (Software Development) graduate from the University of South Australia, with experience in full-stack web development, cloud computing, and Agile methodologies. Skilled in, React, SQL, and JavaScript.

A creative and innovative developer with strong problem-solving skills and a proven ability to work both collaboratively and independently. Recognised for delivering high-quality outcomes that consistently meet and exceed project requirements.

With a strong dedication to enhancing the digital presence through application development and research, I am eager to contribute to growth as a software developer for your company. I look forward to leveraging my technical and creative skills on platforms.

Technical Skills

- **Programming**: C#, SQL, JavaScript (including ReactJS and Node.js), HTML, CSS, PHP, Power BI and Python for dynamic web applications and backend integration.
- **Frameworks and Libraries**: Experienced with ReactJS, and ASP.NET, building RESTful APIs to create reliable and scalable applications.
- **System Analysis & Problem Solving**: Analytical in diagnosing and resolving technical issues to ensure peak performance.
- **Web Development**: A solid foundation in developing and maintaining dynamic, user-friendly websites and full-stack applications.
- **Tools**: Well-versed in Visual Studio, Power BI, D3.js software for development, and data visualisation

Education

Professional Year   **Aug 2024 - Present**
Performance Education, City
Key Subjects: Australian Business Culture and Environment, Achieving Career Success, Australian Workplace Skills and Professional Business Communication

Bachelor of Information Technology (Software Development)   **Jul 2019 - Jul 2024**
University of South Australia, Adelaide
Key learning areas included: Web Technology (INFT 2064), Operating Systems and Tool Chains (COMP 2035), Database for the Enterprise (INFS 2011), Agile Development and Governance (INFS 2041)

Projects

Teachers Dashboard   **Jul 2023 – Nov 2023**
University of South Australia, Adelaide

Objective:	Developed a web application to streamline grading workflows for lecturers using the NetLab remote laboratory.
Tools:	Utilised *ReactJS*, *ASP.NET*, *SQL Server*, and *D3.js* for real-time data visualization, and efficient data management.
Duties:	Led a team of four to design and develop a web application using Agile methodologies, focusing on advanced search functionality, backend data and real-time data management.
Outcome:	Delivered a high-performance, user-friendly web application that streamlined grading workflows and met all client requirements.
Result:	Reduced data retrieval time by 50%, managed 100,000+ logs in real-time, and earned a High Distinction for the project.

Web Portfolio   **Jan 2025 - Present**

Website: https://don-suneth.github.io/portfolio/

Objective:	Developed a personal web portfolio to showcase software development projects, skills, and achievements. The portfolio highlights individual contributions, project outcomes, and technical proficiencies.
Tools:	Utilised HTML, CSS, JavaScript to design and develop a dynamic and responsive website.
Outcome:	Delivered a visually engaging and user-friendly web portfolio, demonstrating a strong grasp of front-end technologies and showcasing a commitment to professional growth in software development.
Result:	Gained positive feedback from mentors and peers, with the portfolio serving as an effective tool for personal branding and career development.

Employment History

Client Relations and Operations Specialist   **Jan 2020 – Nov 2024**

Genlor Trading Services Pty Ltd

Responsibilities:

- Maintained high customer satisfaction by delivering tailored gardening and landscaping solutions and resolving issues effectively.
- Streamlined scheduling and appointment workflows, ensuring timely service delivery and operational efficiency.
- Fostered strong client relationships, driving repeat business and securing referrals.
